Subject: PSHB Docket No. 02-378, Region 41 – 700 MHz Regional Plan Revision

Greetings,

Our Regional Planning Committee has requested approval for the changes to Region 41's 700 MHz Plan. The plan was modified to bring it up to date with the latest information from the FCC and NPSTC. Copies of the modified plan were sent (via email) to all the neighboring Regions (3-Arizona, 7-Colorado, 12-Idaho, 27-Nevada, 29-New Mexico, & 46-Wyoming) on 6 January 2016.

We have received approval/concurrence from Region 3, Region 7, Region 12, and Region 27. The remaining Regions 29 and 46 have not provided acknowledgement or response. Not having received all the neighboring region approvals, we feel that it is important to file our changes for consideration of the FCC, and continue to seek approval for those regions that have not done so. Please accept this filing as submitted.

There are three attachments in addition to this cover letter. The first attachment is a (Highlighted) version that shows changes found on pages 3, 4, 13-17, 19, 21, 28, 29, and 33. Additions are in **red** print and deletions have been ~~lined through~~. The second attachment is a clean copy that shows the edited changes in a publishable format. The third attachment is the concurrence letters for Regions 3, 7, 12, and 27.

It is our hope that this plan will meet with your approval and allow public safety agencies in Utah the continued access to 700 MHz spectrum. If you have any questions, do not hesitate to contact me.

Respectfully submitted,

Steve Proctor, Chairperson
Region 41, 700 MHz RPC
